Moving Beyond the Risk Register: Communicating Risk in the Public Sector

Phil Racco, Senior Manager, Enterprise Risk Services, MNP LLP

Sarah Dionne, Manager, Enterprise Risk Services, MNP LLP

Programs always get stuck in the transactional process of updating a risk register – this can result in a risk-management program becoming a compliance exercise motivated by the need to ‘check a box’ instead of generating real discussion around the threats and opportunities that may impact an organization’s strategy.

An organization’s focus should be on creating a Risk Culture that promotes two-way communication about risk and uses tools such as:

- Risk appetite
- Risk measures
- Risk dialogues

Underpinning these tools is ensuring a solid risk governance structure is in place so that an organization can have confidence that they are addressing risk at the right-level.
