... and more

Despite the increased implementation of data analytics and the latest advancements in information technology, many Canadian public sector organizations continue to face challenges when it comes to enhancing service delivery, decision making, and organizational performance. Business intelligence has emerged as a tool for structuring vital data into meaningful, insightful and valuable information within an automated environment. Incorporating an effective business intelligence framework can help to overcome the many challenges and roadblocks being faced by the public sector.

Benefits of Attending:

- Optimizing Data and Analytics Investments to Achieve Business Value
- Best Practices for Building a Business Intelligence Program
- Leveraging Data & Analytics to Increase your Budget
- Business Intelligence & Data Security: Opportunity vs. Risk
- Hear case studies from Canada, the U.S., all levels of government, and various spheres for application
- Learn what artificial intelligence means for big data

Where BI and AI Initiatives Meet: The New Reality of Data Analytics and How to Plan for Operational Success

Martin McGarry, President & Chief Data Scientist, Bronson Analytics

- Organizations are dipping their toes into Innovation initiatives, Proof of Concepts and AI pilots while BI data operations teams continue their daily toil with little fanfare.
- The foundations of BI are a key factor in the success of any AI initiative
- The change is not just technological but philosophical and must be understood in the C-Level Suite and across your organization
- What should the C-Level leader understand about AI vs BI?
- Join in the discussion on dovetailing these capabilities successfully

14:30 - 15:30 EDT

Analytics to Fight Covid

Gustavo Espinosa, Team Leader & Program Manager, Business Intelligence, Integration, Master Data Management & Quality, City of Brampton

In crisis times such as COVID, information is the most important tool to effectively fight the crisis

Attend to this session to learn how the City of Brampton successfully built in a very short time an impressive Corporate dashboard depicting COVID-19 information, analytics and graphs helping the City senior leadership to manage the crisis, provide accurate updates to media and residents and make informed decisions while day to day things drastically changes. This dashboard is a one-stop-shop for the City's official and senior leadership to quickly see and understand what is happening in the City.

You will also have the opportunity to see the City's Enforcement and Fire divisions COVID dashboard, created within few days to help the City to enforce the Covid rules, understand patterns, decide where to do inspections, where to deploy officers and through location intelligence see geographical patterns and allow Enforcement to notify senior leadership about the Covid inspections activities done in the City.

- Business benefits and over project.
- Demo Corporate COVID-19 Dashboard.
- Demo the Enforcement and Fire COVID-19 Dashboards.

15:30 EDT

Closing Remarks from the Chair

Martin McGarry, President & Chief Data Scientist, Bronson Analytics
