Emergence Leadership in a Disruptive World

Jill Birch, CEO and Founder, BirchGrove Inc.

It's hard to imagine a world before the pandemic: remember back to January 2020 when life seemed so simple? As leaders pivot between "what was", "what is" and "what will be" visions, missions and values are being recast, strategy re calibrated and team strength tested. Leaders are assessing where the biggest gaps exist, technically, functionally and structurally. This means different kinds of behaviour and fresh ways of leading will be needed as we emerge from the pandemic.

Relational leadership is a new way to think about *how* we lead in these disruptive times. When we better understand how leadership happens, relationships improve, costly missteps are avoided, and goals more quickly achieved. Alignment and accountability are crystalized. Decisions become less reliant on what we take for granted and more evidence based. The *7 Stepping Stones of Relational Leadership* is a collaborative framework designed to help leaders make the leap to greater self-awareness and appreciation of the insights and views of others.

Based on ten years of research, Dr. Jill Birch has designed a framework that will empower you to create real and meaningful change, enhance communication, spark authentic collaboration, and integrate new perspectives that spark innovation. Join this energizing keynote address to learn how relational leadership will inspire, motivate, and embody new ways to think about how we lead, how we develop ourselves - and others - as leaders.

Enabling a Data-Driven Culture in HR

Bill Chan, Senior HR Advisor, People & Culture Analytics & Reporting, WorkSafeBC

We have heard some great presentations today about using data to tackle HR issues as well as applying some advanced techniques to that data, but how did today's speakers and their organizations get to this point? How did they embrace a data-driven culture? What even is a data-driven culture, for that matter, particularly in relation to HR? Do you have a data-driven culture already, and if not, how and why should you promote one? Let's take a step back to explore data-driven cultures, how to excite your HR team about the possibilities of data, and some ideas to strengthen their data literacy.

Organizational Network Analysis in Action: Applying Organizational Network Analysis (ONA) Insights to Improve how Business Teams Work at Eaton

Mei Kim, Global Leader, Strategic Workforce Planning & Workforce Insights, Eaton

How actionable are insights from ONA? These are questions we often get challenged with as People Analytics Practitioners, especially as ONA evolves to become a core capability within a people analytics function. In this session, we describe how we positioned ONA as a means to uncover insights that help improve the way business teams work with each other, ensure onboarding success with start-up teams, and quite simply, how teams build accountabilities within their roles. The 2 key take-aways from this session are (1) How to build the case for ONA with your business (2) Deliver ONA insights that inform actions to improve business results.

Building and Implementing an HR Analytics Team in Smaller Organizations

Zac Nichol, Senior Consultant, MNP Digital

While the future is never certain, HR executives and practitioners recognize that analytics will play an increasingly important role in decision making of their organizations. From the ability to clearly understand what has happened, to the capability to provide prescriptive action to managers regarding what should happen, analytics is a key resource to any HR organization. This session will help you gain insight into the power of analytics and the contribution it can make to the organization even if you are starting with minimal resources and people.

- Build an HR analytics function when resources are limited
- Learn how to gather data and ensure that it's uniform, accurate and consistent
- Set goals and KPIs to ensure HR processes are completely fact-based and aligned to your organization's way of thinking
- Explore what makes people analytics different from other analytic fields
