Benefits of Attending:

Data is more than just numbers and letters. Increasingly, data is becoming more personalized and useful, evolving everyday to not only meet our needs, but create possibilities that we never could have fathomed before. But with new possibilities comes new problems. Get the latest developments regarding data governance for the public sector. Stay current and prepare yourself for the evolving digital world of data governance.

Get Expert Advice and Case Studies On:

- Developing the human aspect of data
- Understand the how various data roles can affect effective data strategies
- What are some effective data strategies?
- Modern concerns regarding data ethics and privacy; why should we care?
- How to balance the need between accessible data and data privacy
- How data can be used to ease our everyday lives
- What does the future of open data look like for the public sector moving forward?

Data Governance for the Public Sector

November 8 - 9, 2022 • Big Data Workshop: November 7, 2022 • Virtual Course

DAY ONE PROGRAM AGENDA: TUESDAY, NOVEMBER 8, 2022

13:30 - 14:30 EST

Data Governance in Community and Social Service Delivery

Katie Gibson, Vice President, Strategy Partnerships, CIO Strategy Council

- Canada's community and social service providers deliver services and support to vulnerable and at-risk individuals, many with government funding.
- Most of these organizations collect and use client data, some of which is sensitive – such as participation in addiction treatment, a health diagnosis, or experience of violence
- As these organizations adopt new technologies for client management, this can multiply the amount of data under control of organizations and their vendors and can pose serious new risks to privacy and security which may not be well understood.
- Community and social service providers are uniquely vulnerable to these risks materializing
- The importance of the responsible collection, storage, use, and sharing of client data is therefore increasing to manage the risks and vulnerabilities. In addition, with the appropriate guardrails in place, community and social service providers can better use the data available to them to serve their mission

14:30 - 15:30 EST

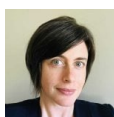

Bridging the Gap! A Pragmatic Approach for Moving from Policies and Rules Established for Data Governance

Sherin Emmanuel, Enterprise Information Architect & Strategist, Canada Revenue Agency

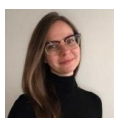

This presentation will discuss the effective implementation in Data Management practices to facilitate decision making backed by quality data

10:30 - 10:45 EST

Welcome and Opening Remarks from the Chair

Trevor Banks, Organizational Development Manager, Digital Talent Management, Treasury Board of Canada Secretariat

10:45 - 11:45 EST

Department of National Defence and Canadian Armed Forces Data Stewardship Model

Steve Gooch, Data Governance Strategy Lead, Department of National Defence
Marie-France Guindon, Manager, Data Governance, Department of National Defence

- The Data Stewardship Model supports the execution of data governance and data management activities.
- Stewardship exists in multiple tiers from executive-level to working-level stewards.
- DND/CAF must balance its requirement for data security with its need to share data for operational effectiveness/efficiency
- Key cultural and organizational priorities must be reflected in the data governance model in order to support the CAF
- A large change management/culture shift must be undertaken to elevate the importance of data and that data is stewarded and not owned.

11:45 - 12:45 EST

Improving Data Quality with Data Science Methods

Jenny Ye, Director, Data Engineering, Canada Energy Regulator

12:45 - 13:30 EST Break

13:30 - 14:30 EST

AI and Cloud Migration

A Tale of Two Cities: Changes in Shopping, Working and Tourism Behaviors in a Post-Pandemic Year

Nader Shureih, Vice President, Business Development, Public Sector, Environics Analytics

11:45 - 12:45 EST

Machine Learning for Estimating Heterogeneous Treatment Effects in Program Evaluations

Andy Handouyahia, Acting Director, Data, Methodology and Evaluation, Employment and Social Development Canada

Tristan Rikhi, Senior Data Analyst, Employment and Social Development Canada

The study shows how the Evaluation directorate at Employment and Social Development Canada uses rich administrative data and Modified Causal Forests, a causal machine-learning estimator, to inform policy development through impact evaluations. The study also illustrates the implementation of the innovative Modified Causal Forests algorithm to estimate individualized treatment effects, thereby informing what works for whom. This study lays the foundation for the conduct of evaluation from a Gender-Based Analysis+ perspective with a view to inform differential impacts of policies and programs on people of various socio demographic backgrounds. In particular, it provides a distribution of net impacts for key sub-groups of participants in addition to the average program impact.

12:45 - 13:30 EST Break

13:30 - 14:30 EST

The New Real-Time Data Tools for Public Policy and Global Affairs

Danielle Goldfarb, Vice President, Global Affairs, Economics and Public Policy, Real-Time Interactive Worldwide Intelligence

Data Governance for the Public Sector

November 8 - 9, 2022 • Big Data Workshop: November 7, 2022 • Virtual Course

BIG DATA WORKSHOP PROGRAM AGENDA: MONDAY, NOVEMBER 7, 2022

14:30 - 15:30 EST

Navigating Made, Found and Lost Data

Howard Ramos, Chairperson, Canadian Statistics Advisory Council

- The federal family has an abundance of made and found data but also loses billions of dollars because of lost data resulting from a lack of coordination
- Legislation is one tool to promote coordination, however, policy and practice as well as relationships are key to stewardship
- Statistics Canada is uniquely placed to coordinate data and relationships and offer infrastructure to support the digital and data opportunities of the 21st century
- There is a role for all sectors and jurisdiction to build a robust statistical system
- Key to a strong statistical system is also access to the information and data in it and forethought on building data literacy of users and the broader public

15:30 - 16:30 EST

New Opportunities and Challenges for Digital Government Public Engagement and Decision Making

Sid Tobias, Mayor of View Royal, Director, Digital Services, Environmental Assessment Office, Government of British Columbia
